

NATURE FUSED WITH TECHNOLOGY.

Odor control to enhance interior environments.

VECTAIR
OMNISCENT™
Continuous Odor Control System

VECTAIR
SYSTEMS

NO AEROSOLS

"We are technological innovators in the hygiene world. We take pride in the quality and design that is invested in our products. We want to make your lives easier, with systems that work for you. And we want to make sure that they last."

Vectair Systems Inc.

Vectair Omniscent™ is a large space fragrance delivery system. It releases high quality fragrances continually and consistently to large interior spaces, creating a positive user experience in areas such as gyms, reception areas, conference rooms and hotels.

MORE TECHNOLOGY

Unlike conventional aerosol fragrance systems, Vectair Omniscent™ works by utilizing ceramic cartridge technology instead of an aerosol refill, providing total user control of output and intensity.

Vectair Omniscent™ is fully programmable, with a choice of low, medium or high output options and hours of operation.

Vectair Omniscent™ is lockable and suitable for a fixed installation or a variety of portable applications, whatever your requirements.

Vectair offers a unique private labeling facility, allowing you to display your logo on the dispenser.

MORE FRAGRANCE

The disposable ceramic block is gently heated within the unit and fragrance is dispersed via an internal fan.

This gives large, uniform fragrance coverage over an area of up to 17,600 cubic feet.

The ceramic cartridge blocks are biodegradable and environmentally friendly, while being safe to handle and easily replaceable.

Cartridges last up to 4 weeks, depending on location conditions.

The range of Vectair Omniscent™ fragrances is extensive and derived from wood, fruit, spices and flowers, to name but a few.

Bespoke and customer specific fragrances can be created upon request.
