*"We are technological innovators in the hygiene world. We take pride in the quality and design that is invested in our products. We want to make your lives easier, with systems that work for you. And we want to make sure that they last."*

**Vectair Systems Inc.**

Vectair Omniscent™ is a large space fragrance delivery system. It releases high quality fragrances continually and consistently to large interior spaces, creating a positive user experience in areas such as gyms, reception areas, conference rooms and hotels.

## TECHNOLOGY

Vectair Omniscent™ refills work by utilizing ceramic cartridge technology instead of an aerosol refill, providing total user control of output and intensity. The disposable ceramic block is gently heated within the unit and fragrance is dispersed via an internal fan.

This gives large, uniform fragrance coverage over an area of up to 17,600 cubic feet.

The ceramic cartridge blocks are biodegradable and environmentally friendly, while being safe to handle and easily replaceable.

## MORE FRAGRANCE

The ceramic cartridge blocks are biodegradable and environmentally friendly, while being safe to handle and easily replaceable.

Cartridges last up to 4 weeks, depending on location conditions.

The range of Vectair Omniscent™ fragrances is extensive and derived from wood, fruit, spices and flowers, to name but a few.

Bespoke and customer specific fragrances can be created upon request.
