*VECTAIR SANITEX™ MVP TOUCH FREE WITH WHITE WINDOW.

We take pride in the quality, design and innovation that is invested in our products. We want to make your lives easier with cost effective, easy-to-use systems that work for you. And we want to make sure that they last.

Vectair Systems Inc.

This product meets the Green Seal™ Standard for Institutional Hand Cleaners, GS-41, based on its reduced human and aquatic toxicity and reduced smog production potential.

MORE QUALITY

Combining a next generation dispenser design with luxurious soaps and sanitizers, promoting maximum hygiene and leaving hands clean.

Every part of our system is rigorously tested and monitored for only the best performance. Choose either a manual or 'touch free' automatic dispenser, available with optional color inserts to match any décor.

Choose one of our thick and super rich lathers in either foam, liquid or spray, with moisturizers and natural conditioners. These are kind to your skin and dermatologically tested.

Incorporated into this range is our professional surface care system, designed and developed to leave any hard surface safe for use. Our surface cleaner has been tested to stringent FDA 1994 TFM protocols.

MORE INNOVATION

Robust and reliable systems that are beautifully simple to operate and service.

As the most critical component of our soap system, the pump can endure thousands of activations.

Maximum hygiene with Biomaster® (silver ions) protection which reduces non-pathogenic microorganism growth, preventing product degradation.

Durable soap cartridges are sealed and therefore hygienic. Delivering the optimum amount of soap, minimizing waste and saving you money.

Refill packaging is fully recyclable.

Biomaster® antimicrobial silver ions protection and odor eliminating technology provides round the clock protection against microbial build up, giving safe, effective and permanent antimicrobial protection to the surface of the Vectair Sanitex™ MVP cover against degradation.
