

The Next Advancement in Diamond Pads

Treleoni

DIAMOND PAD II

A Truly Better Diamond Pad

Now With Maximum Performance Indicators

First generation diamond pads are problematic. The diamond coating wears thin before the pad does and the operator has no way to tell it's no longer working.

Introducing the Next Advancement in Diamond Pads.

The Treleoni Diamond Pad II solves the problem by incorporating easy to see Maximum Performance Indicators into the advanced pad structure. Three MPI on the Treleoni Diamond Pad II stay **RED** as long as the pad is performing and disappear when the diamonds do. A better structure means a longer lasting pad.

Choose the right diamond pad. Treleoni Diamond Pad II is the next generation with Maximum Performance Indicators. Available in all popular sizes and grits of 400, 800, 1500 and 3000.

MAXIMUM PERFORMANCE
INDICATORS

TRELEONI
