

## Help dispose of potentially harmful contaminants with Toter Step-On Containers and Medical Waste Carts

A primary concern in a medical or institutional setting is the prevention of exposure to and the spread of contamination during waste disposal. The CDC references a touchless waste receptacle as a method to help lessen exposure and maintain good hygiene.\*

Toter’s Step-On Containers are designed as an easy, hands free method to dispose of waste that helps prevent the spread of harmful germs. They are also fire resistant and comply with UL94-V2.

Toter’s Medical Carts are designed specifically for the healthcare industry, with smooth interior walls that are easy to clean. Available in a variety of sizes and with optional caster wheels, these carts are ready to meet your daily needs.

Many of our products are in stock and can effectively be delivered in 3 to 5 business days, therefore meeting your need to help create a healthier environment.\*

*\*Per the CDC’s Interim Infection Prevention and control Recommendations for 2019-nCoV.17*
