

MDI's Nonwoven Wipers Can Play a Critical Role in Cleaning, Sanitizing and Disinfecting Surfaces

Designed as a reliable and consistent tool for critical cleaning, MDI's nonwoven wipers help reduce the risk of cross-contamination associated with reusable microfiber, rags or rental towels. Our wipers are strong wet or dry, solvent resistant, and deliver the performance of cloth with the peace of mind that comes from disposing of the wiper when your task is complete.

MDI's Super Rag® in Perf-Pak™ dispensing poly packs have a unique perforated opening that allows for controlled dispensing and ensures unused wipers stay clean. They are perfect for use in bucket systems — pull out what is needed and the rest stay protected in the pack.
