

Right Wiper, Right Size, Right Pack.

A Complete Line of Controlled Dispensing Solutions from MDI

Choosing the correct wiper grade for a task is only the beginning. To select the lowest cost-in-use option you need:

- A properly sized sheet
- A pack that dispenses one wipe at a time to control usage and reduce waste
- A storage method that keeps the product clean and conveniently ready for use

When it's time to show your customer cost savings, consult **The Wiper Specialists®** at MDI.

We'll help you determine the right wiping substrate — from rag replacement to high performance low lint towels to general purpose clean-up wipes.

Our experts will figure out the best sized wiper for the job, from 6"x9" sheets for delicate tasks up to 12"x17" towels for the biggest jobs. Then we'll recommend a Tote Box, Pop-Up Box, or Two-Pak™ that will satisfy your customers' needs.

As always, we provide product samples for testing at no charge, and we're always happy to make a site visit when phone support just won't do.
