KITCHEN MATTING

Treat your employees like royalty with Crown Food Service mats.

Every step you take, to every dish you make, the foundation to your success begins with proper food service matting.

We understand the health conditions and the pains that you can develop over time due to standing long hours. With that in mind, we developed food service matting solutions catered to fit your unique environments.

Crown Kitchen Matting offers a full line of floor matting solutions to assist you with supporting your culinary and service crews.

CARE AND MAINTENANCE

USE & CARE INSTRUCTIONS – ENTRANCE MATTING

Regular maintenance of your mats is critical to extending mat life and appearance. It is recommended to develop a regular maintenance schedule. The frequency will depend on traffic and soil conditions.

INITIAL MAT USE

- 1| Within a few days of receipt, rolled mats should be unrolled and laid flat.
- 2| Normal shedding or "fuzzing" may occur with new carpet top mats. This will disappear after a few vacuumings.
- 3| Some rubber mats may have an oily or sticky film on them. This is a releasing agent that is inherent to molded mats, not a defect. Simply wash down with a mild detergent or degreaser to remove this film.
- 4| To store mats lay them flat in a dry area with moderate temperatures. Do not stand on end or crush.
- 5| Make sure all floor surfaces are 100% dry before putting mats down.

PERIODIC INSPECTION

Periodic inspections are recommended on a regular basis to check for border tears. To repair a damaged border or area, glue the section together with cyanoacrylate ester type (super glue) adhesive.

CARPET MATS AND HDNP PRODUCTS

Entrance mats are used to capture dirt and debris before they can be tracked into a facility. However, mats must be cleaned regularly to extend their usefulness and appearance.

- 1| Vacuum daily.
- 2| Hand wash or extract stains with a carpet spotter using a water-based carpet detergent or shampoo.
- 3| Periodically clean the mat with a carpet extractor.
