

SURFACE DISINFECTANT WIPES

Frequently Asked Questions

Q:	What is the contact time needed for PRO-SERIES Disinfectant Wipes to kill COVID-19?
A:	This product kills SARS-CoV-2, the virus that causes COVID-19, on hard non-porous surfaces in 30 seconds.
Q:	Are PRO-SERIES Disinfectant Wipes effective against various strains of SARS-CoV-2?
A:	EPA expects all products on List N to kill all strains and variants of SARS-CoV-2. Genetic changes to the virus do not impact the efficacy of disinfectants. Click here to read the EPA statement.

Q:	Can PRO-SERIES Disinfectant Wipes be used to sanitize hard non-porous surfaces?
A:	Yes. Follow the sanitizing instructions printed on the label under Directions for Use. For surfaces that may come in contact with food, a potable water rinse is required.
Q:	Do you need to wear gloves when handling PRO-SERIES Disinfectant Wipes?
A:	Gloves are not required for normal use. If prolonged contact is likely, we recommend wearing gloves. Wash hands thoroughly with soap and water after handling.
Q:	How do you properly dispose of PRO-SERIES Disinfectant Wipes?
A:	The product label includes complete disposal instructions. PRO-SERIES disinfectant wipes may be disposed of in the trash after use. Do not flush in toilet. For disposal of infectious materials, blood and other body fluids should be autoclaved and disposed of according to local regulations for infectious waste disposal.
Q:	Do PRO-SERIES Disinfectant Wipes have an expiration date?
A:	Because testing determined the product to be shelf stable for 12 months, EPA does not require an expiration date. We recommend using PRO-SERIES Disinfectant Wipes within 12 months of manufacture date.
