

REFILLABLE SURFACE WIPING SYSTEMS

Protecting human health and safety has never been more of a priority. Per CDC guidance, a crucial aspect of reducing exposure to germs is routine cleaning, sanitizing and disinfecting of frequently touched surfaces.

Surface cleaning in high traffic institutional settings calls for CLASSIC® professional grade disposable towels, available in several sizes and formats, to accommodate a wide variety of task work. Made from bulky, high performance apertured material, these towels quickly pickup debris and easily rinse out after surface cleaning.

Use your preferred chemical with confidence because CLASSIC towels are compatible with commonly used sanitizers and disinfectants. These high performance towels readily charge and thoroughly release solution without reducing efficacy. To create a customized soak & wipe system for cleaning, sanitizing

or disinfecting, simply fill out and apply the supplied GHS-compliant label to the refillable charging bucket and place CLASSIC towels inside. Prepare your preferred liquid chemical according to the manufacturer's instructions, pour it evenly over the wipers, and securely close the lid to prevent spills and keep contaminants out. The resulting portable surface wiping system creates access to a fresh, charged wiper for every task. After the last wiper is deployed just refill the bucket with wipers and the same chemical indicated on the label.

CLASSIC towels are also an excellent option for use in dip & wipe open bucket sanitizing methods and spray & wipe procedures.

Customizable surface wiping systems from MDI are reusable to increase the life of the system and flexible to accommodate your unique sanitizing needs.
