

Wipers are a Critical Component of Scheduled Plant Maintenance Programs

Plant cleaning sets your projects up for success. PRO-SERIES® wipers are designed to get critical cleaning tasks done right the first time.

HEAVY DUTY JOBS PRO-TOWEL® HEAVY DUTY

For a trustworthy clean, use these heavy duty towels instead of rags and laundered shop towels that can introduce trace chemicals and foreign substances into your processes. Two-Pak dispenses one-at-a-time, has a carry handle and is high capacity for fewer change outs.

PRECISION CLEANING SUPER RAG® UNIVERSAL

Solvent resistant towels designed for applying chemicals such as degreasers, rust removers and general cleaners. Virtually lint-free for use on critical parts and machinery. Pop-up box dispenses one-at-a-time.

GENERAL CLEANUP THE CHAMP®

Great for wiping away grease and oil buildup on equipment. Thick, absorbent all-purpose wipes are also soft for contact with hands and face. Center-pull tote box has a sturdy carry handle and dispenses one-at-a-time.

DUSTING CLASSIC® DUST CLOTHS

Efficient, effective dust control for cleaning rafters and reducing overall particulate on the factory floor and in the front office. Treated dust cloths attract and retain dust - no sprays needed. Poly bagged in 50's.

*Wiper Tip #3:
Shutdowns are expensive. Keeping the proper task-specific wipers easily accessible in portable dispenser boxes with one-at-a-time dispensing reduces waste and increases efficiencies - getting you back in operation faster.*

Wipers are essential to maintaining the look, cleanliness, efficiency and safe operation of every facility and its equipment. At MDI *The Wiper Specialists*® will help you assess wiper needs and select a product lineup to help keep your maintenance plans on schedule and your operation running cleanly.
